

NADA FAROOK.

FULLSTACK ENGINEER

nadaaofficial19@gmail.com github.com/NadaaFarook linkedin.com/in/nada-farook x.com/___Nadaaa

Fullstack engineer who enjoys working on the front end and is currently exploring system design. Currently at **RNDM Labs**.

STACK

FRONT - END Next.js, React, React Native / Expo, TypeScript, React Query, Zustand, Tailwind / shadcn, Recharts

BACK - END Node.js, Fastify / NestJS, PostgreSQL, Prisma, Supabase

AI LLMs, Stable Diffusion, Langchain, N8N

EXPERIENCE

RNDM Labs

JUNE 2025 - AUG 2026 · 1 YEAR 3 MONTHS

Fullstack Engineer

- Jenius** · TikTok-style social app where engaging with a post buys into the creator's token [jns.fun](#)
- Built the social feed where liking a creator's post lets users buy their token, giving creators a way to earn from engagement.
 - **Video performance:** set up a video transcoding pipeline with **FFmpeg** to generate multiple qualities, so the feed could serve the right one for the user's internet connection.
 - **Internal tooling:** built internal tools and automation to support daily market operations, including an admin console and a second trading interface.

Helios · trading platform for predicting short-term moves in oil and gold [helios.rndm.io](#)

- Shipped as a React Native mobile app and a web app where users predict whether oil or gold moves up or down over 15 minutes, for a fixed payout that settles on-chain in USDC.

Dudu Alpha Hub · AI research tool for sports betting markets [dudu.rndm.io](#)

- An AI research tool that compares market odds against its own predictions to find potential opportunities.
- Built the answer engine that combines live market data, web search results, and model predictions before generating a response with the LLM.

Fetcch Labs

APR 2024 - MAY 2025 · 1 YEAR 2 MONTHS

Frontend Engineer

- **SDK design for AI agents:** built an AI agent SDK that lets developers interact with Move-based blockchain protocols through AI.
- **Complex interactive UI:** built the drag-and-drop builder for Mixtool, which spins up production tooling using multiple AI agents.
- **Auth wallet SDK:** built a wallet-based authentication SDK similar to Privy.

Aeos Labs

MAR 2023 - MAR 2024 · 1 YEAR

AI Frontend Engineer

- **Model evaluation:** built an evals system that automated testing for LLMs and image-generation models, making it easier to compare outputs and iterate on prompts. Used across several products we built in-house.
- **Image-model pipelines:** built a tool that turns rough room sketches into photorealistic renders, fine-tuning the model to preserve layouts and generate culturally specific elements like **mandirs** and **ganesh idols**.
- Built a tool for a newspaper company (Dainik Bhaskar) to streamline article creation with AI, tuned to match the publication's own writing style.

PROJECTS

Mockman github.com/neogcamp/mockman

Postman, but for mock backends: a drop-in React component for testing MirageJS or JSON-Server routes without wiring them into a project first. Published on npm as **mockman-js**, downloaded **over 80k times**.

Audionotes [audionotes.app](#)

Tool that turns voice recordings, text notes, and YouTube videos into structured notes.
